SHRUB, BUSH MAINTENANCE PROGRAM

**Catholic Cemeteries
Diocese of
Rockville Centre**

From the Cemetery Rules and Regulations: Where permitted: "No shrub or bush is to exceed the following height restrictions, preferably **they should be kept four (4) to six (6) inches below the maximum size permitted.** The height restrictions are as follows: 3 feet for a lot that consists of three graves recorded on the same Certificate. 4 feet for a lot that consists of four graves recorded on the same Certificate. 5 feet for a lot that consists of five graves recorded on the same Certificate. 6 feet for a lot that consists of more than five graves recorded on the same Certificate. No shrub or bush is to exceed the height of the door on a family mausoleum. The cemetery management shall be the sole judge to the design or shape and portion of the maintained shrubbery.

Shrub and Bush Maintenance Program

Catholic Cemeteries feels strongly that a well maintained, balanced shrub or bush not only enhances the natural qualities of the plant -but will add to the over-all beauty of a family lot, compliment a family monument, and make this place a well-kept cemetery.

While it might be the intention of the Certificate-holder of the lot to keep it well maintained, it is generally agreed that over the years this does not always take place.

We therefore recommend to the Certificate-holder and their heirs to consider the Cemetery's Shrub Maintenance program.

The cemetery staff can help trim the following types of shrubs and bushes at your family lot:

Approved Plantings

Dwarf boxwood

Alberta Spruce

Skyrocket dwarf Junipers

Other dwarf style bushes

Problems with plant maintenance

Families invest a significant amount of money into a family memorial to honor their loved ones buried at the cemetery. Shrubs and bushes placed without a maintenance plan can lead to over-growth that becomes unattractive and covers a beautiful family monument.

While shrubs and bushes can be trimmed practically any time of the year, if planned for and done properly on a regular basis the plant's best shape or form can be displayed. Well selected material will add to the beauty of the monument, its color contrast and shape.

Unattended shrubs and bushes require severe pruning to conform with regulations. Severe pruning can threaten the life of the plant whereas constant and consistent maintenance of the plant material can result in a beautiful shape, balance, complimentary, plant fitting to the lot and its surrounding area.

Regular trimming maintenance goes hand in hand with a routine visual inspect for good plant health.

With regular maintenance throughout the growing season, early detection of growth related problems are possible. A treated bush can be saved when early detection occurs.

Wild life, Birds, & other Animals are likely to be attracted to a seldom maintained plant.

Discolored Yellowish or brown bushes look unsightly in color.

*From the Cemetery Rules and Regulations: Where permitted: "No shrub or bush is to exceed the following height restrictions, preferably **they should be kept four (4) to six (6) inches below the maximum size permitted.** The height restrictions are as follows: 3 feet for a lot that consists of three graves recorded on the same Certificate. 4 feet for a lot that consists of four graves recorded on the same Certificate. 5 feet for a lot that consists of five graves recorded on the same Certificate. 6 feet for a lot that consists of more than five graves recorded on the same Certificate. No shrub or bush is to exceed the height of the door on a family mausoleum. The cemetery management shall be the sole judge to the design or shape and portion of the maintained shrubbery.*
